SECTION 2: BACKGROUND, PURPOSE, AND SCOPE OF WORK

2.1 Background and/or Purpose of this Bid

Since its inception 31 years ago, Airports Company South Africa SOC Limited (ACSA) has transformed into a focused commercial enterprise that is market-driven and customer service oriented. The company was formed in 1993 as a public company under the Companies Act of 1973, as amended, and the Airports Company Act of 1993, as amended.

ACSA operates South Africa's Nine (9) principal airports, comprised of the country's major international airports, namely, O.R. Tambo (ORTIA), Cape Town (CTIA) and King Shaka (KSIA) and the smaller regional airports, namely, Chief Dawid Stuurman International Airport (CDSIA), King Phalo Airport (KPA), George Airport (GRJ), Bram Fischer (BFIA), Kimberley Airport (KIM), Upington (UTN). ACSA's registered corporate office operates from Airport Park in Kempton Park right next to the OR Tambo International Airport.

ACSA's vision is to be the most sought-after partner in the world for the provision of sustainable airport management solutions by 2030. ACSA's strategy is to create and operate world-class airports measuring up to international standards, its strategic intent is supported by three strategic pillars, namely:

- Run Airports: Run our airports efficiently, optimally, and innovatively.
- Develop Airports: Optimise assets and plan for new capacity and growth opportunities.
- Grow Footprint: Seek growth opportunities in the continent and world.

Run airports

Develop airports

Grow footprint

ACSA's Integrated Airport Planning Division (IAP) is responsible for the timeous and orderly development of airport infrastructure for all ACSA airports. To facilitate this, development frameworks are required, namely master plans and precinct plans.

The 11th edition of the International Air Transport Association's Airport Development Reference Manual (ADRM) states that "a master plan is required so that all airside, landside, and airport support elements can develop, expand and improve the operational flexibility and efficiency of their business in a structured,

balanced and orderly fashion. This is without adversely impacting on the business of their neighbours on or adjacent to the airport.” By doing this, the potential of the available land will be maximized, as will the capacity of the airport's runway system and terminal areas.

In line with best practice, ACSA Integrated Airport Planning continuously prepares and reviews its development frameworks.

In 2018 ACSA commenced with the process of developing airport master plans for George, Kimberly, Upington and Bram Fischer airports as well as precinct plans for Chief Dawid Stuurman Airport and King Phalo Airport. The master plans were to be developed the following macro phases :

- Setup Phase
- Strategic Scan
- Strategic Planning Objectives
- Baseline Definition
- Macro Options
- Detailing Preferred Mater Plan Options
- Conceptual Design and Costing of the 1st Development Phase of the Master Plans

During the process of completing these frameworks, the COVID-19 pandemic impacted on our ability to conclude these plans. The teams appointed, delivered the frameworks up to a strategic level (preferred option), and did not complete the remaining final *detailing and conceptual design of the 1st phase of development phases* of the frameworks. Integrated Airport Planning is now in a position to complete these to enable better alignment and the necessary visuals/renderings which are essential to aid discussions with stakeholders.

Therefore, it is the intention of this project to provide development frameworks required over the next three years, these being the detailing and completing the development plans phase of the Regional (George, Kimberly, Bram Fischer and Upington) Airport Master Plans and Chief Dawid Stuurman International and King Phalo Airport Precinct Plans.

Finally, ACSA will embark on infrastructure developments for the provision of additional capacity and improved operations in the near term at several airports. To inform these projects, conceptual designs and the associated costing and scoping statements are required. This conceptual design study will focus on ensuring that we improve our capacity, modernize and refresh our facilities, improve passenger facilities and services, enhance passenger experience and commercial activity, and improve our overall sustainability.

2.2 Purpose of this Bid

The purpose of the RFP is to acquire the services of a suitably qualified and experienced service provider/s to complete the detailing phases of the George, Kimberly, Upington and Bram Fischer airport master plans and Precinct Plans for Chief Dawid Stuurman International and King Phalo Airport.

2.2.1 Objectives

The service provider will be expected to ensure that all proposals/options and deliverables are aligned to the following objectives:

- **Strategic Positioning:** Aligned to relevant national policy and provincial and local government frameworks and plans of the respective regions, the vision and strategy of ACSA's overall business as well as to that of the CIAM Integrated Airport Planning Division.
- **Technical Feasibility:** The proposed solutions must be able to accommodate the required demand and comply with industry standards.
- **Sustainability:** The plans must be socially responsible, economically viable / environmentally sensitive.
- **Cost Efficiency:** The proposed plans must optimise operations and reduce operational cost for both ACSA and industry stakeholders during and post construction.
- **Functional Integration:** Transportation systems, engineering services and land uses (aviation and commercial) must be integrated and coordinated internally and externally.
- **Flexibility:** The plans must be responsive to a variety of scenarios (traffic, technological etc.)
- **Modular:** The plans/frameworks must be phase-able.
- **People Orientated:** Meet the needs of passengers, workers, clients, general airport users and surrounding communities.
