

## AIRPORTS COMPANY SOUTH AFRICA HOSTS GRADUATION OF AFRICAN AVIATION SECURITY PROFESSIONALS

**KEMPTON PARK, South Africa, 2 December 2019** – Aviation security in Africa has received a boost with the graduation of 20 people from the Aviation Security Professional Management course, the most advanced aviation security training programme which carries a formal designation of AVSEC PM.

The programme was developed by the International Civil Aviation Organization (ICAO) in collaboration with the John Molson School of Business at Concordia University in 2004. The latest group to graduate brings to 500 the number of people that have successfully completed the programme.

The group officially graduated at an event in Kempton Park hosted by Airports Company South Africa. The 20 aviation security professionals who graduated last night include seven people from South Africa.

Speaking at the event, Jason Tshabalala, Group Manager for Security at Airports Company South Africa said: “We are honoured to be able to host this graduation for ICAO as the organisation which sets, maintains and monitors aviation standards and practices for all countries.

“Aviation security is critical to those of us in the airports business where we have to contend with a variety of potential threats that are always evolving. Aviation security is a specialised field and the availability of suitably qualified professionals is crucial to ensuring the security of the travelling public,” he said.

The aviation security programme is one of the essential elements of ICAO’S global drive to develop a broad base of skills in the field and enhance the safety and security of passengers.

“ICAO has been active for many years in helping countries to implement ICAO Standards and Recommended Practices (SARPs). The main goal of this work is to help ensure that SARP implementation is better harmonised globally so that all countries have access to the significant socio-economic benefits of safe and reliable air transport,” said Tshabalala.

“We believe that the African Continental Free Trade Agreement will provide a boost for air travel both within the continent and globally, which should make application of the highest standards in aviation security a priority for Africa.

“In this context, the AVSEC PM qualification is a significant aspect of ICAO’s efforts to resolve Significant Security Concerns (SSCs) brought to light through ICAO’s security oversight audits as well as other security and emissions-related objectives,” said Tshabalala.

The aim of the Aviation Security Professional Management Course is to provide aviation security middle and senior management personnel with new management skills and a greater understanding of the application of Annex 17 of ICAO’S Standards and Recommended Practices.

The training programme is designed to equip aviation security management personnel with the ability to perform more complex and diverse tasks and display greater communicative and management skills to meet new and emerging threats to civil aviation.

The programme comprised of 70% security and 30% management is devised for air transportation industry managers, or future managers, whose functions involve responsibilities in the area of aviation security.

Students successfully completing the programme have permanent access to an exclusive e-network community of aviation security experts who have successfully completed the PMC curriculum. This community facilitates the sharing of information and optimises the diffusion of knowledge relevant to international aviation security requirements and best practices, training strategies and promotes intra-regional and international cooperation among its members.

The AVSEC PM graduating class of 2019 is:

Given Names	Surname	Country	Position	Company
Stanley	Jansen	South Africa	Supervisor Aviation Services	Airports Company South Africa
Bradford	Wood	South Africa	H.O.D	K9 Law Enforcement
Muhammad Masud	Pervez Rana	Bangladesh	Assistant Manager Security	Biman Bangladesh Airlines Ltd.
Julian	Gouws	Namibia	Acting Chief AVSEC	NCAA
Mario	Joseph	Kenya	Logistics Officer	United Nations Support Office in Somalia
Fanuel	Matafire	Zimbabwe	AVSEC Supervisor	G4S Secure Solutions (Iraq)
Jan	Cuypers	Belgium	Aviation Business Transformation Manager	Securitas Transport Aviation Services
Marco	Henar	Suriname	Administrative Manager	Secure Airline Security
Calista	Goabas	Namibia	Leading AVSEC officer	Namibia Airports Company
Azmat	Rehman	United Arab Emirates	Ground Operations Officer	Abu Dhabi Aviation
Mirlen	Brown	South Africa	Quality Manager	Bidair Cargo
Cornelius	Claassen	South Africa	Training Manager	Contracting
Abdoulie	Colley	Gambia	Director of Airport Operations	Gambia Civil Aviation Authority
Gaolathe	Mokae	Botswana	National Chief Inspector - AVSEC/FAL	Civil Aviation Authority of Botswana
Marisa	Taino	South Africa	Aviation Security Inspector: Airports and Airlines	South African Civil Aviation Authority
Cynthia	Dlamini	South Africa	Air Cargo Inspector	South African Civil Aviation Authority
Agnes	Nyabuti	Kenya	Senior Aviation Security Inspector	Kenya Civil Aviation Authority
Milton	Ogola	Kenya	Senior Aviation Security Inspector	Kenya Civil Aviation Authority

Zanele	Zwane	South Africa	Aviation Security Inspector	South African Civil Aviation Authority
Albert Outoka	Ekaya	Kenya	Security Manager	Kenya Airways

### About Airports Company South Africa

Airports Company South Africa is the largest airport operator in Africa. Our mission is to develop and manage world-class airport infrastructure for the benefit of all stakeholders

We manage South Africa's nine principal airports\*. In fulfilling this task, Airports Company South Africa facilitates more than 80 percent of South Africa's commercial air travel. Our airports process some 42-million arriving and departing passengers a year.

In the 2018/19 financial year, Airports Company South Africa reported total revenue of R7.1-billion. Currently 55% of Airports Company South Africa revenue is derived from regulated tariffs for aircraft landing and parking fees and a passenger service charge. The remaining 45% is non-aeronautical revenue generated by airport retail, parking, property and other services.

Airports Company South Africa's global footprint extends to technical advisory services and support, airport management, and operating concessions in India, Brazil, Munich, and Ghana.

We also frequently feature among the winners of independently-judged global airport awards. In the 2019 Skytrax World Airport Awards, administered independently by Airports Council International, our airports received the following awards:

- Air travellers voted Cape Town International Airport the Best Airport in Africa. This is the fourth year running that Cape Town International Airport secured this award.
- King Shaka International Airport in Durban won this year's award for Best Regional Airport in Africa and Best Airport Staff in Africa serving 5-10 million passengers. The airport has also been recognised previously in the Skytrax awards.
