MEDIA RELEASE

Fuel supply at George Airport

28 December 2016. Johannesburg. Airports Company South Africa confirms that due to an off-specification delivery of Jet A-1 fuel, supply at George Airport will be affected. Our operations management team is working closely with our fuelling partners to ensure that the operational impact and any flight delays are minimal. We are also making sure that all our interventions prioritise the safety of all passengers.

Contingency plans have been instigated, which include fuelling at other airports, or redirecting flights to ensure sufficient Jet A-1 stock. The next shipment of Jet A-1 at George Airport is expected to arrive in the second week of January 2017.

We will continue to monitor the situation closely and provide further updates. Airports Company South Africa offers its sincere apologies to all passengers who may be impacted. Passengers are advised to check all travel details with their airlines.
