

Good day,

Supply and Deliver of Slashers, Tractors, Petrol Cylinders, Brush Cutters, Chain Saws, Mowers, and Sprayer for a Period of 12 months at ACSA: Chief David Stuurman International Airport. Tender number PEA7053/2022/RFP

QUESTION	ANSWER
Is ACSA looking at appointing just one bidder or maybe three. We saw that ACSA has listed couple of items.	One bidder. It will also depend on how the bidder proposes, approaches and executes the tender: whether they will be bidding as JV or subcontracting arrangement.
Will the items that ACSA is buying, will they belong to ACSA or is it items that that are going to be hired out for that particular service whether it's mowing, maintaining plants? Or does ACSA want to own them?	ACSA is buying equipment/items/machinery from the bidder. Items are not going to be procured through any other agreement or lease instead they are being bought from the winning bidder. ACSA will then own these assets.
If a bidder is supplying ACSA with this equipment, what is the purpose of also submitting training certificate or operators?	The operators are our own staff that will be using the machine on the day-to-day basis. So, the service that will be provided by the winning bidding entity will be that of supplying the items/ assets and then also training the operators in terms of competency in terms of using those assets.

Do we need to be registered with a professional body for in line with trainings and all to that or to be accredited for with a professional body that deals with a machinery of some sort.

What would machinery, training certificate and all those things?

Would it be required in after delivering?

No. Bidder must comply with listed requirements. Professional registrations and accreditations are not required. Bidder to test machines on site and train staff for competence.

With kind regards

Johnson Mji
