

Parking Facilities

Re Partial re-opening of the shaded parking and creation of a temporary long stay parking facility within the shaded parking.

Due to the pandemic and the subsequent National Shutdown, only the multi storey parkade was kept operational at King Shaka International Airport.

In view of the phased reopening of the economy and the aviation sector and the lowering of the Alert Levels to Level 1, part of the shaded parking will now be opened for use with effect from the 01st November 2020. There will be two dedicated entrances to service this parking facility. The parking bays will be available on the right-hand side of the entrance closest to the pedestrian walkway. Please note that there will be no shuttle services available.

A further 300 bays will be provisioned in the shaded parking which will be used as a **TEMPORARY** long stay parking facility to respond to demand for the product category. The area will be located on the left hand side of the entrance to the shaded parking, close to the walkway. The extreme left entrance of the shaded parking will be used as the dedicated entrance for the **temporary** long stay. Please note that there will be no shuttle services available.

This will be a temporary relief to the situation which will offer our passengers the option of the other product categories available at our airports.

The parking office can be contacted on 032 436 6626/7 for parking rates or alternatively one can use the parking calculator on our website <https://www.airports.co.za/utilities/parking-calculator> and select King Shaka International Airport and insert the dates and click on the calculate button.
